Glow Tube VE

GENERAL LIGHTING

Wide Angle Down Light

Narrow Angle Down Light Mini III

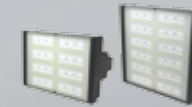

Spot Light

Fresh Light

Floodlight

High Bay Light

The Fabric Method

- Our coverings are knitted polyester fabric coated with polyurethane.
- A single piece of fabric can cover up to 5m in width without joints or seams, guaranteeing a perfectly smooth surface and uniform tension.
- Due to its knit properties, the coverings can wrap easily around beams, cornices, rosettes, doors, windows, etc. with ease.
- In addition, the integration of mechanical, electrical heating and plumbing fixtures are easily accomodated.

The Innovative Concept

Width up to 5m

Innovative profiles
ABS, ALU and PVC

Cold and dry installation
Fast, easy and clean

Printable
